

Praise be to Allah alone, Peace and Blessings upon His Prophet.

The Department of Chemistry was established in the academic year 1433-34 AH. The department provides the opportunity for students to obtain a solid knowledge of the broad field of chemistry at the undergraduate (B.S.) level. The department of Chemistry is at the forefront of Prince Satam Bin Abdulaziz University departments in its distinguished qualified staff, both in terms of academic, research, and contributions in the service of the university and the community. Department of Chemistry aims to provide a high level educational and research program. It seeks a basis for the development of practical and experimental knowledge to its students in addition to the use of the best educational methods to raise student to the excellent scientific level.

Our undergraduate program offers an innovative approach that provides students with outstanding training for a variety of career paths including careers in the chemical industry, academia, medicine and government, as well as other fields and research opportunities.

Kindly visit our website for more information about the chemistry department.
